

Installation Manual

Collection: Prato

Tools required for installation

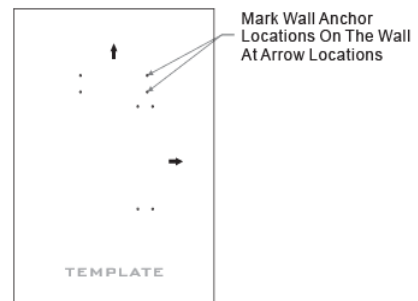

Warning:

When handling glass, use eye protectors and gloves for protection.

Step 1 Template mounting

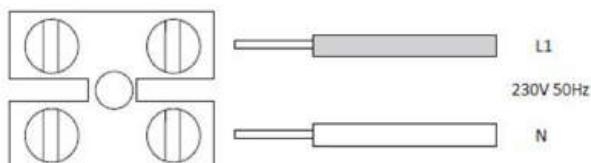

The template is provided to assist you in mounting the mirror. The template is a full size drawing of your mirror and includes the wall anchor mounting locations that can easily be transferred to the wall, or use the mirror.

Step 2 Wiring

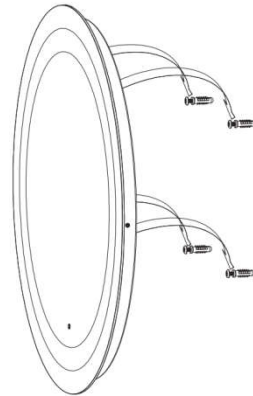

PLEASE NOTE! Electrical work should be carried out by a qualified electrician.

- If the cable is damaged or not working, contact your retailer to get it exchanged.
- The light source contained in this luminaire shall only be replaced by the manufacturer or his service agent or a similar qualified person.

Step 3 Mounting

Mount the mirror to wall mount screws.

Product features and cares

1. Product Features

- Touch the touch round symbol bottom to control LED light ON/OFF.
- Long press touch round symbol bottom LED color can be switch from 3000K yellow to 6500K daylight color or 6500K to 3000K.

2. LED Mirror Care

- For best possible care of your bathroom furniture, use ordinary washing-up liquid for the painted surfaces. Avoid products that contain abrasives, acids or ammonia. Other surfaces that may be more porous are best cleaned by using a moist cloth and the same mild washing-up liquid. In this case, too, do not use scouring powder or products containing abrasives, acids or ammonia.
- Only recommended products should be used for keeping the glass clean. After use, wipe off water from shower glass with a soft cloth.
- Never use an abrasive cleaner on the glass as it may cause scratching.
